## WORKS COMMENCED AT THE NEW BREWERY SITE

Divall's Earthmoving & Bulk Haulage have secured the earthworks contract with BrewPack for their new brewery site in the old Linfox building on Hume Street. Our team started work in the first week of March, and are in the process of removing the cement floors ready for the new brewing equipment.

Divall's are very excited to be part of BrewPack's new venture with the completed brewery expected to employ more than 150 people as operations come into full swing.

CEO Anton Szpitalak, said the brewery should be up and running by September / October this year and has approval to brew 30 million litres of beer annually. The company's other sites include areas for manufacturing, tasting and master classes – something Mr Szpitalak wants to introduce to Goulburn.
