

# NEWS UPDATE SEPTEMBER 2017

## Truck 38 & 39 Hit The Road!

We are very proud to have added another two trucks to our fleet! Both number 38 and 39 are now on the road after an extensive fit out process including radios, turntables, signwriting, accessories and tracking & safety equipment. These trucks are replacing number 23 and 24 which have served us well for the past 10 years.

The Kenworth vehicles were ordered from Canberra Trucks and took approximately 10 weeks to build with an additional 2 weeks taken to make them 'service ready'. The trucks themselves are Australian built by Paccar Melbourne.

From the moment our equipment is delivered, a strict maintenance regime begins ensuring our ongoing commitment to the safety of the community, our employees and other road users is maintained. This process also ensures the vehicles utilised by the Divall's team are always in the best possible condition and major mechanical issues are avoided.

Truck 38 is in the capable hands of Tom Francis who has been driving with us for 15 years and Truck 39 is being handled by Jason Chalker who has been with us for 14 years.
