

JANUARY 2014 NEWS UPDATE

TARALGA WINDFARM

In July 2013 Divalls were successful in obtaining the contract from Downer EDI for the earthworks at the Taralga wind farm.

Work was commenced in December 2013 and now in January the project is well underway with a number of machines & crew established onsite.

The site is to house 52 wind turbines and is anticipated to be completed by August 2014.

Due to the large scale of works, Divalls has been able to employ local residents of Taralga and the surrounds to help complete the job; as well as recommending & utilising local contractors to complete works outside the scope of Divalls.
