

NEWS UPDATE

July 2011

Divall's Earthmoving & Bulk Haulage are proud and excited to announce that on the 1st July our company was awarded the CCF 2011 Earth Award, Category One.

This award was presented by the Civil Contractors Federation (CCF) at the annual Earth Awards held in Sydney and is recognised at a state level.

The **CCF Earth Awards** have the specific aim of recognising outstanding work in construction and environmental excellence which reflects development and use of the best technologies by Australian civil contractors.

This provided Divall's with the opportunity to present our company's capabilities to the industry, our clients and prospective clients with the submission of a recent project undertaken at Lynwood Quarry, Marulan. The project of works comprised of the construction of a sedimentation dam for Holcim (Australia) Pty Ltd.

The Lynwood Quarry is located on land used by the Gundungurra and Ngunawal people which provided significant cultural heritage and conservation zone management requirements.

The construction of a sedimentation dam within the area of an aboriginal cultural heritage zone is one of the most challenging projects faced by many companies, including Divalls Earthmoving & Bulk Haulage.

The **Earth Awards** are the most prestigious awards in civil infrastructure including; roads, bridges, railways, marine structures and utilities that are the economic veins & arteries that flow around Australia.

We are very honoured to be presented with this award and would like to thank our committed staff and sub contractors whom continue to deliver our services at the highest standards to our valuable customers and clients.

Further information about these awards can be found at <http://www.civilcontractors.com/EarthAwards/index.html> .
