

45 TONNE KOMATSU EXCAVATOR – P450LC-8

On the 30th October, 2013, Divall's Earthmoving & Bulk Haulage took delivery of a brand new 45 Tonne Komatsu Excavator (P450LC-8)

As the Construction Industry expands and the demand for various works to be carried out quickly and economically grows, it is imperative that we are able to provide our Customers and Clients with the right machine for their job.

The P450LC-8 incorporates the latest technology, ergonomics and features to ensure high productivity at a minimal operation cost. Some of these features include:

- High Production and Low Fuel Consumption
- Excellent Machine Stability
- Easy Maintenance
- Large Digging Force

- Low Emission Engine
- Low Operation Noise
- Larger more comfortable Cab

This machine was primarily bought to carry out work at Gunning Water Treatment Plant, and will then move on to Taralga Wind Farm. Both Management and Operators are excited to offer this new piece of machinery to our Customers.

For further information on the P450LC-8, machine hire rates or a free quotation, please contact our office on (02) 4829 8200.
