

NEW CATERPILLAR D6T BULLDOZER !

On Friday 6th November, 2015, Dival's Earthmoving & Bulk Haulage picked up a new Caterpillar D6T Bulldozer, to add to their fleet of machinery.

The Cat D6T has earned a reputation as one of the best in its class due to its versatility and productivity value. It can be used across a varying range of jobs including bulldozing, ripping and trimming.

It is Dival's top choice for jobs such as:

- Dam Construction
- Fire Trails and Roads
- Wind Farm Pads,
- House and Shed Sites
- Land Clearing
- Subdivision Work

The D6T Bulldozer also encompasses the Cat NOx Reduction System which captures and cools a small quantity of exhaust gas, then routes it into the combustion chamber where it drives down combustion temperatures and reduces NOx emissions.

Both management and operators are excited to offer this new piece of machinery to our customers.

Gary Collins, a Senior Plant Operator and key team member of Dival's, is very excited and proud to be operating this new and reputable piece of equipment.

For further information on the Caterpillar D6T Bulldozer, machine hire rates or a free quotation, please contact Dival's Earthmoving on 02) 4829 8200.
